Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: The amendment of claim 1 to recite that the air flow was provided with a blowing duct which was arranged beneath the drawing duct channel wherein the blowing duct included air outlet nozzles aligned at an angle toward the filament sheet is a new issue which would require further search and/or consideration. It should be ntoed that this language comes from claim 9 which was withdrawn from consideration and the language presented directed to the blowing duct has not been previously considered. It should be noted that applicant's changing of claims 5 and 6 to make them dependent upon claim 4 has been noted and as such claims 5 and 6 are now allowable over the prior art of record, however claim 1 has been amended in such a manner that the same would require further search and/or consideration and the amendemnt after final has not been entered.
